The Annual Meeting of Stockholders will be on Tuesday, August 3, 1971, at 9:00 a.m. at the Ramada Inn in Wichita.

TRANSFER AGENTS: First National City Bank, New York City, and First National Bank in Wichita.

REGISTRARS: Franklin National Bank, New York City, and First National Bank in Wichita.

AUDITORS: Ernst & Ernst.

This year Pizza Hut, Inc. began to mature as a public company. The "shake out" in the fast food industry, coupled with a soft economy, was a significant test to our basic concepts of operation. Our stockholders can be assured we not only survived, but prospered. While such a year points out our strengths, it also makes our weakness and mistakes painfully apparent.

We are taking aggressive steps to capitalize on our profitable areas, and realistically work on our problems. Both of these situations will be more fully examined in this letter, after capsulizing our performance.

Total net sales for fiscal year ended March 31, 1971 were \$31,067,034 . . . up from \$23,382,341 . . . an increase of 32.9 percent. Net income increased 22.7 percent from the \$1,041,851 reported last year to \$1,278,640. Earnings per share showed a 21.4 percent increase, moving to 51¢ on 2,497,141 shares from 42¢ on 2,497,306 shares reported last year.

A 22.7 percent increase in income and earnings is cause for celebration in many corporate headquarters. But the 51¢ in earnings per share included 8¢ resulting from a tax savings. Earnings from operations were decreased by \$179,000 or 7¢ per share as a result of non-recurring losses from unprofitable operations. These losses were charged to operations in fiscal 1971 and therefore, on a continuing basis, our earnings would reflect 50¢ per share.

The Taco Kid and Next Door divisions were both non-profitable for the same reasons. They were expanded too rapidly, and over too wide an area. Experience has shown us that numerical and geographic expansion must not proceed faster than the related management and support systems.

During this past year we took the following steps in Taco Kid and Next Door: (1) slowed expansion, (2) closed units in which the operating losses were greater than the fixed monthly costs, and (3) initiated programs to increase the volume and profitability of

established units. These decisions have allowed our management, in these two divisions, to concentrate their efforts on those units where profitable results could be shown.

Taco Kid, now under the leadership of Jim McNerney, has responded well under this format. He and his people have decreased the operating loss significantly in the last few months.

Larry Payne is making progress with fewer Next Door units in our revised format, while Jim Anderson is testing the revised concept of a smaller unit designed for smaller cities.

The Pizza Hut Division under the direction of Darrel Rolph continues and will continue to dominate corporate activity. We are still in an accelerated expansion program, and during the last fiscal year the number of Pizza Huts increased to 667 . . . 139 more than a year ago.

Pizza Huts are now located in 43 states and four foreign countries. At the end of the fiscal year 87 Pizza Huts were leased or under construction.

Company-owned unit growth is only a part of the Pizza Hut Story . . . the franchisees also play a major role in the development of the system. Our franchised growth has caused us to close franchising activity in the United States, except for our minority program, to all but people within the system.

Although there are many excellent one and two unit franchised operators, the main impetus for growth comes from our multiple operations groups. Our top ten groups, for instance, own in excess of 230 units and next year plan a minimum of an additional 70 units.

To strengthen our regular communication with our franchisees, we have instituted a Franchisee Advisory Board which meets quarterly so that a representative group can be used as a sounding board for company policies — the growth and direction of the chain. The benefit of this exchange cannot be expressed in dollars and cents, but must be considered a valuable company asset.

# report to the stockholders

The pace in foreign development is quickening with Australia leading the way in current expectations. Jim McPeak's efforts in the Australian market place are achieving success both with company owned and franchisee development.

Frank Gordon and Stan Ostrowski have achieved product acceptance in Munich and are continuing company-owned unit development. We plan ultimately to have 25 to 30 company-owned units in Australia and a like number in Germany. European franchising should commence in late fiscal year 1972. We feel a strong operational base is necessary prior to franchising.

Our national advertising program, which includes company and franchisee units, dominates the pizza segment of the fast food industry. Our Research people have produced the "fast cook" oven to increase our effective unit capacity. Our Training Department has produced a high quality, low unit cost, audio-visual training program to provide better training for personnel at the retail level . . . a program

designed for increased profitability. Our Management Information Services people, in cooperation with the accounting section, have centralized our computerized operational control system.

The Flaming Steer project under Jim Aboud is continuing at a steady pace. Number one is showing good profit and number two opened this Spring in Topeka, Kansas. The initial volume indicates a profitable venture.

Franchise Services, Inc. is becoming more deeply involved in the distribution system. This system, optional for franchisees, delivers over 95% of the weekly needs to the door of the local Pizza Hut. The system now covers 239 operations, 112 company and 127 franchisees. FSI systems are currently being computerized for greater control.

This year we announced the acquisition of 80% of Ready Italy, Inc. with 20% being retained by Mr. Gene Cortese, the former owner/operator. Ready Italy is a frozen pizza crust company in Fargo, North Dakota supplying products to frozen food manufacturers. Pizza Hut uses no frozen crusts in its own units, but the frozen pizza market is expanding rapidly and should be fertile ground for the expertise your company is

developing in its major product line.

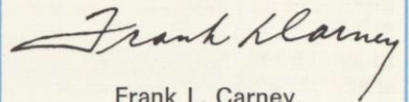

Last year PHI entered into a joint venture with Sunflower Packing Company to form Sunflower Food Processors, Inc. This vendor supplies cooked sausage and beef toppings to many of our units. We entered into this arrangement because your Company needed the additional expertise for a serious entry into this market.

As you know, in early March we entered into negotiations with financially troubled Pizza Inn, Inc., a Dallas, Texas based chain. The reasons for Pizza Hut, Inc.'s involvement are (1) a potential increase in profits due to an increase in volume and a decrease percentage-wise in overhead, (2) the ease of assumption of operation because of the similarity of the concepts, (3) stronger national coverage with the addition of profitable, mature units, and (4) supplementary operational expertise from a similarly developed chain. As of this writing, Pizza Hut, Inc. has cancelled the merger agreement and is securing its collateral position under the terms of the Agreement in principle.

Corporate overhead has received increased attention. Adjustments are constantly being made to decrease our selling, general, and administrative expenses.

Our overall commitment is to our people, because only people produce profits and a return on investment for stockholders. Part of that commitment involves increased professional management training for our middle and top management groups. We are building a strong base with young, energetic management and they are developing and producing the programs that will carry Pizza Hut, Inc. for many profitable years to come.

Respectfully,

Frank L. Carney,  
President

## pizza hut® history

**T**he Pizza Hut Story, like every success story, is built on the timely action and correct decisions of earlier years. Nothing brings this into sharper focus than a review of the Pizza Hut history. It began with a new food idea, a small loan, two enterprising brothers with an eye on the future, and a partner with an art for making pizza.

In 1958 Daniel M. Carney, a Wichita State University graduate student, obtaining his masters degree in Business Administration, and his brother, Frank L. Carney, an undergraduate leaning toward electrical engineering, opened the first Pizza Hut in Wichita. Public response was immediate and a year later they had expanded their operation to five huts.

Highlights through the years include:

1959 — incorporation in Kansas; first franchise outlet opens in Topeka.

1962 — corporation buys out third partner; Robert Chisholm joins as Treasurer.

1963 — standard design for Huts is adopted.

1965-67 — continued growth of franchisee groups developing multiple operations.

1968 — PHI acquires capital stock of 129 franchisee corporations.

1969 — after meeting SEC requirements, 410,000 shares of common stock offered to the public on January 30. Acquired Taco Kid, Next Door and Flaming Steer operations. Also acquired Franchise Services, Inc. and J & G Food Co., Inc. Opened additional huts in Canada and Mexico.

1970 — new International headquarters formally opened by Kansas Governor, Robert B. Docking, Garner E. Shriver, Kansas' Fourth Congressional District Representative in Washington, Daniel M. Carney, Chairman of the Board and Frank L. Carney, PHI President. All PHI food divisions, management departments, Research and Development Center and the electronic data processing center are now operating from a central location.

PHI also announced a joint venture with the Sunflower Food Processors, Inc., which supplies a number of Pizza Hut operations.

# pizza operations today

An additional step into diversification in the food industry was the PHI acquisition of 80 percent of Ready Italy, Inc. The principal business of this company is the manufacturing of frozen pizza crusts for frozen food companies.

The purchase of Franchise Services, Inc. enabled PHI to expand their marketing and distribution facilities to all operations. J & G Products, the manufacturing division of Franchise Services, Inc., has begun moving into new quarters, which will substantially increase the PHI production capabilities.

An increase in PHI popularity overseas indicates that pizza also recognizes no language barrier. Australia's first hut, located in the Belfield District of Sydney, took only a few months to begin recording weekly sales figures far in excess of the U. S. national average amount.

There are now three franchised huts and one company-owned hut in Australia. In Germany, one hut is operating and another under construction is near completion. If the word pizza is not yet in the travel dictionary, it shouldn't be long before PHI puts it there.

1971 was another year of successful operation for Pizza Hut, Inc. This fiscal year saw the addition of 139 Pizza Huts in the United States, with 100 of these huts added during the six-month peak construction period of March thru September. 1971 also saw expansion into the International scene with four huts in Australia and one in Germany.

During fiscal 1971, the Pizza Operations Department has worked diligently to tighten the control of daily hut operations. Effective January, 1971, Pizza Operations reorganized from six regions into three Wichita-based regions: East, Central and West.

Key advantages for this restructuring to a home office base include more informed top operational management, better planning and control for the company's largest operating division, greater flexibility in moving swiftly to meet problem areas in the field, and a reduction in supervisory overhead.

This move also strengthens the field position of the Area General Managers by involving them more closely in the overall company management. Franchisees benefit by increased contact with experienced operational people familiar with the specific problems of their geographic section of the country.

Pizza Operations has begun a scheduled program of management training, in cooperation with the Training Department. This two-phase program starts with a one-week session of general training in company policies and procedures, along with presentations by all staff members to explain the functions of their various departments and how they can assist the field management personnel attain their goals.

Although the major effort of the Operations Department has been in the areas of control and management training, they have also instituted salad and sandwich programs in all huts.

Pizza Operations has introduced, and is using, a redesigned interior for new huts. The new interior features a combination of booths, tables and beamed ceilings to produce a warm, friendly atmosphere for Pizza Hut customers.

for a successful future

Eating out has become a way of life for American families. Over 40 billion meals were served in the United States last year, chosen from a wide variety of eating establishments.

One of these — Pizza Hut — providing a quality product in a distinctive atmosphere, is now the world's largest pizza specialty chain. The expanding population, and the increased activity in eating away from home points toward the need for additional well run, high quality food systems. PHI has moved toward that goal by acquiring Flaming Steer, Taco Kid and Next Door. The present operations of these three concepts are providing training, operating development and management analysis data to guide future development.

Last year Pizza Hut, Inc. announced the opening of the first Flaming Steer in Wichita. A second Flaming Steer Steak House is scheduled to open in May, 1971, in Topeka, Kansas. This was also the site of the first Pizza Hut outside Wichita.

Both units incorporate a Spanish-Mediterranean motif. The interior features a cathedral-type beamed ceiling with roomy, black leather booths for a warm, intimate atmosphere. The exterior is a unique six-sided design, and constructed from dark red brick and cedar.

A brick, open-hearth grill charbroils the house specialty — steak — in full view of diners. A varied menu of seafood, chicken, sandwiches, salads and desserts is offered and customers from the business world crowd Flaming Steer for lunch.

The addition of a private club called the Bum Steer is scheduled for both the Wichita and Topeka units.

PHI acquired 80 percent of the Flaming Steer concept in fiscal 1970. The remaining 20 percent has been retained by the developer, James J. Aboud, president of the Flaming Steer subsidiary.

The Taco Kid acquisition was made as an investment in the future. The Mexican food concept has popular appeal and a good prospect for profitability in properly managed locations.

In total, however, the Taco Kid Division has suffered because of an overemphasis on rapid expansion. The resulting strain on management control and related support systems caused outlets with good potential to suffer; and marginal outlets to sustain substantial losses.

An evaluation of this situation has led to a significant slowing of new unit construction, as well as the closing of units with losses in excess of fixed costs.

To date the results have supported the action. The Taco Kid division has definitely improved its financial picture.

We will consider further expansion of this program when existing units form a strong volume and profit foundation; and as management and control techniques are refined.

Present and future emphasis will be concentrated on the profitability of the existing 40x40 eat in — carry out units. The basic menu features tacos, tostados, burritos, taco burgers, frijoles, enchiladas and soft drinks.

The Next Door Division of PHI represents a vast marketing potential in the growing "family dining" food field. It has the elements for sound profitability, as evidenced by the success of the pilot unit.

The Next Door concept, however, is unlike other fast food divisions at PHI in that the menu is more complex and requires a greater investment in food preparation equipment, as well as more extensive management knowledge at the retail level.

The first year of operation was hampered by an overly aggressive expansion program which spread operating units over too large a geographic area for effective management control. This operating problem was further compounded by spiraling land costs and increased costs in construction and equipment.

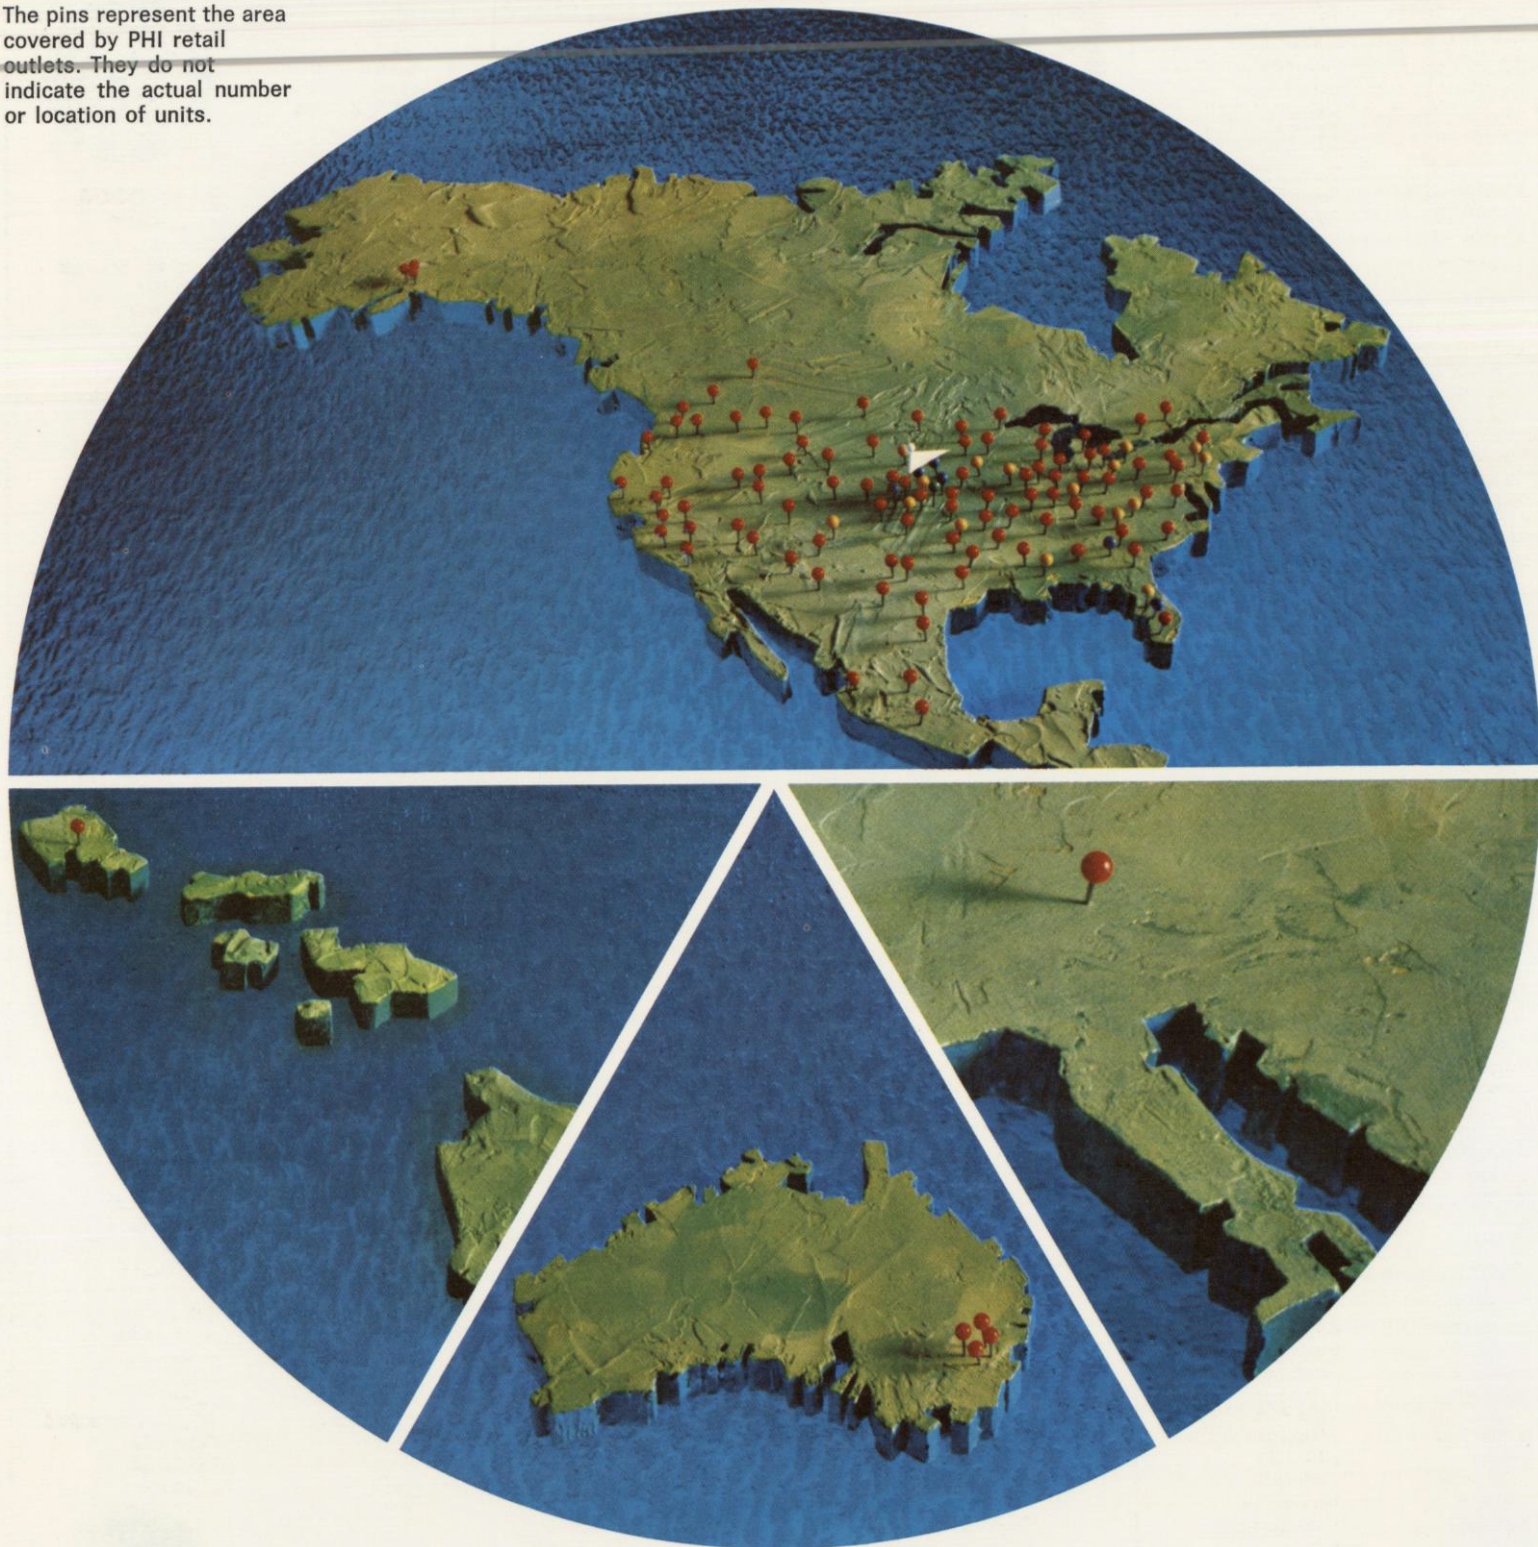

Management decisions have been implemented to resolve the problems of the Next Door division. Immediate action was taken to curtail expansion, and four non-profitable units were closed.

A development program is underway to lower the cost of the physical facility through modification of the building and equipment. The new floor plan provides smaller, more efficient food preparation and dining areas.

This revised concept, to be tested in the fall of 1971, will provide greater utilization of the facilities and reduce overhead — making the Next Door concept more suitable to city suburbs and smaller communities.

The pins represent the area covered by PHI retail outlets. They do not indicate the actual number or location of units.

pizza hut®, inc. .... people... progress

People are the major ingredient in the success of PHI . . . People at both the retail and the management levels. By working together, they have made your company the leader in its field.

PHI history shows that future managers often begin in the retail operations, where they are able to learn the very basics of a complex business. The strong lines of communication between all areas of operation allow PHI to develop these future managers.

Yearly regional meetings to provide a two-way communication between the home office and specific field problems, play an important role in keeping every employee a vital part of the total program. Area General Managers visit individual Pizza Huts to supervise operations, quality and profitability.

New Area General Managers receive an intense two-phase training program which combines classroom and on-the-job training.

Training and indoctrination programs for the retail organization is provided by a portable, high quality, low unit cost audiovisual unit. These movie/sound presentations are available to each retail location through the Area General Manager. Subjects covered include customer relations, product preparation and waitress training. Additional subjects will be available in the near future.

People are the key to PHI success. And we are fortunate in having people who care about maintaining a quality product and quality service.

## franchise services, inc.

**S**ervice is the key word at Franchise Services, Inc. This operation gives Pizza Hut, Inc. the capability to offer both company units and franchisees a single source of equipment and supplies at competitive prices. This also makes it possible to eliminate costly commissary facilities, excess inventory and expensive management time.

Last November, FSI established truck routes and schedules to service the PHI nationwide organization. Already forty-foot trucking rigs log 38,500 miles a month. Deliveries have increased from half a million pounds per month to more than a million and a half pounds.

Computerizing location numbers for warehouse items has resulted in considerable dollar savings by shortening the time needed to locate, stage and ship orders.

J & G Products, the manufacturing division of FSI has occupied new quarters (30,000 sq. ft.) and includes a mill shop which constructs booths, table tops and Pizza logo signs; a sewing shop, where Pizza Hut and Next Door uniforms are made; the silk screen area where approximately 50 sets of 5-foot Pizza men are painted each month, as well as the promotional banners used by the Huts. Forty thousand "goodie bags" (basic pizza spices) are blended each month; and in addition other combinations of spices are blended for tacos, sausage, spaghetti, chili and hamburgers.

J & G Products uses over 13,000 pounds of wax each month to pour 1200 cases of candles. It has its own sheetmetal shop to manufacture candle holders and table arrangers; and an upholstery shop and cutting tables to manufacture the durable naugahyde tablecloths. Employees are trained in multiple functions so that production schedules can be planned for maximum utilization of personnel.

The ultimate goal of FSI, as with all institutional suppliers, is to provide PHI operations quality products, when they need it, and at the lowest possible cost.

# management information services

every successful corporation must recognize the need for accurate and timely financial reporting. This premise was the basis for establishing a department of Management Information Services, whose primary function is to provide company management with pertinent information from all areas of the organization.

In June, 1970 an IBM System 360 computer was installed with both tape and disc capabilities. The physical facilities include 2000 square feet of raised computer flooring and 1000 square feet in the keypunch area. A precise environmental system is in operation 24 hours a day to control temperature and humidity, which is mandatory to an efficient data processing operation.

Computerized accounting and operational procedures include centralized bill paying for all Pizza Hut, Next Door and Taco Kid operations; centralized payroll for all company employees; a weekly summary of all field input; preparation of financial statements for each unit, area and region, as well as a consolidated report reflecting the combined financial position of PHI and all subsidiary operations.

The MIS department is organized under two distinct functions . . . data processing operations and systems and programming.

The Systems and programming function is geared to work with and for all departments in developing and implementing successful systems. The objective of each system is to satisfy the user departments' information requirements, thus increasing the potential for profit through better control. Long-range plans for the computer include developing a centralized information system by integrating accounting, financial, sales, operational and historical information into a central data base system.

**a**lthough the laboratory seems an unlikely place to find pizza, it's not at all unusual in the PHI Research and Development Department. R & D began in 1969 with limited laboratory facilities, but now the section uses sophisticated equipment designed to aid in quality control, cost reduction, the development of new products, and the evaluation of equipment.

The quality control and food production techniques developed by R & D is one of the primary reasons for PHI's leadership position among pizza specialty chains. One such machine that contributes to this high quality level is the fat extractor which indicates the percentage of fat in a given sample of meat. A high fat content produces a soggy pizza — a low content results in dry tasteless meat.

## research and development

The Centrifuge aids in determining the fat content of cheese as well as the amount of time which will elapse before a salad dressing will separate. The vacuum oven determines moisture content of meats and cheese. The pH meter tests acid content of cheese and tomatoes — all factors contributing to the quality of our pizza.

Suggestions submitted for menu diversification are tested and evaluated by this department. Taste panels are scheduled regularly to test a wide variety of items. Panelists record their opinions which are later used as a part of the total evaluation of the test item. Luncheon programs for the Pizza Huts, utilizing salads and submarine sandwiches, were developed in this department.

Other products created in the R & D kitchen include spaghetti; baked beans and onion rings (for the Next Door program); baked chicken and gravies (used at Flaming Steer); hot sauces (for Taco Kids) and the meatball sandwich (still in the testing stage).

In addition to maintaining a high quality control, and expanding menu selections, cost reduction is often dramatic after R & D evaluates a product. Incubators are used to grow bacteria in food samples. A product with a high number of

bacteria will spoil faster, thereby increasing food costs.

Once cheese was purchased in bulk and sliced in the Huts. Pre-sliced cheese has been found to save time and maintain more consistent quality.

All equipment used in the retail units is tested by R & D for total evaluation. Quick recovery ovens are a prime example of this program. To solve a problem created by heat loss from opening oven doors, R & D designed and tested a new oven concept which was adopted and is being manufactured by a PHI supplier. All ovens now purchased are this design: however, another major contribution by this department was the simultaneous development of an inexpensive kit to convert ovens already in use.

Outside companies contribute to the utilization of this well-equipped laboratory by contracting for development and quality control of their products by the PHI Research and Development department.

**t**he first Pizza Hut franchisee was an employee who wanted to go to another area to start his own group of huts. This first move into franchising proved to be the basis for all PHI franchise agreements, even today; they all stipulate that any franchise is required to have operational ownership.

Most franchisees have been with the company for many years, with their growth and management expertise paralleling that of PHI. As a group they display loyalty and the strength of character that every company needs for success.

The Franchise Service Center, an integral part of the Franchise Department, at PHI corporate headquarters in Wichita, is the primary source of communication between the franchisees and company management. The Center is responsible for maintaining and channeling the immense flow of data between the company and its franchisees on a timely basis.

To supplement this line of communication, the company also publishes a monthly newsletter which is sent to all franchisees and includes news articles and management information of general interest to everyone in the system.

Regional meetings are held once a year for the specific purpose of providing franchisees, company field and staff personnel an opportunity to exchange ideas and discuss any problem areas. In addition, the company Area General Managers visit all franchise huts in their respective areas at least quarterly to assist franchisees in their operations.

Over 90 percent of the franchisees belong to the International Pizza Huts Franchise Holders Association (IPHFHA) which was organized to develop a national advertising program in 1968. In addition, IPHFHA sponsors group and casualty insurance programs, and makes it possible for franchisees to participate in a credit union.

The association of ideas, harmony of goals and unity of purpose which exist between PHI and franchisees is responsible for the rapport developed at all company levels. This rapport is in large measure responsible for the success of the PHI franchise system.

# NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Pizza Hut, Inc. and Consolidated Subsidiaries

March 31, 1971

1971

1970

## NOTE A — ACCOUNTING PRINCIPLES

The consolidated financial statements include the accounts of all majority held domestic subsidiaries after elimination of significant inter-company accounts and transactions. The investment in foreign subsidiaries is carried at cost which approximates the Company's equity in the foreign subsidiaries' net assets.

During the year ended March 31, 1971, the Company acquired controlling interests in three corporations for 2,750 shares of its Common Stock and \$30,000 cash in transactions accounted for as purchases. Accordingly, the operations of these businesses have been included since date of acquisition. The cost in excess of net assets acquired in these transactions of \$60,203 is being amortized over periods varying from 5 to 40 years. The results of operations of the acquired corporations for the current and immediately preceding periods were not material in relation to the Company's operations.

The cost in excess of net assets acquired in transactions accounted for as purchases in prior years (\$421,866) was not amortized, since in the opinion of management, there has been no diminution in value.

## NOTE B — NOTES PAYABLE AND LONG-TERM DEBT

The Company has pledged inventory in the amount of \$562,262 and accounts receivable of \$1,031,059 as security to a current note payable to others having an unpaid balance of \$378,829. All other current notes payable to banks and others are unsecured.

At March 31, 1971, and March 31, 1970, the Company and its consolidated subsidiaries were indebted under long-term debt agreements as follows:

Mortgage notes due in monthly installments aggregating \$15,860, including interest at rates of 6% to 9½%, maturing at various dates to 1989. Land, buildings, and leasehold improvements with a carrying value of \$1,605,961 have been mortgaged as collateral .....	\$1,206,352	\$1,015,247
Capitalized lease obligation payable to 1985 in increasing monthly installments, including interest from 7½% to 8¼% ...	975,000	
6% real estate mortgage notes due in 1971. Land with a carrying value of \$90,439 has been mortgaged as collateral .....		70,000
Equipment notes requiring monthly payments of \$4,895 to 1974, including interest at rates of 5% to 15%. Equipment with a carrying value of \$169,549 has been mortgaged as collateral .....	137,536	48,550
8½% unsecured note due in monthly installments of increasing amounts ranging from \$4,000 to \$12,000 plus interest through January 1, 1973 ...	195,000	225,000
Other unsecured notes .....	46,660	76,637
	<u>2,560,548</u>	<u>1,435,434</u>
Less amounts due within one year ...	258,560	178,597
	<u>\$2,301,988</u>	<u>\$1,256,837</u>

The aggregate maturities for each of the five years ending March 31, 1976, are as follows: 1972 — \$258,560; 1973 — \$328,137; 1974 — \$184,482; 1975 — \$177,992; 1976 — \$182,533.

#### **NOTE C — DEPRECIATION AND AMORTIZATION POLICY**

Provision for depreciation of buildings and equipment was made on a basis considered adequate to amortize the cost of the depreciable assets over their estimated lives by the straight-line and accelerated methods. Leasehold improvements were amortized by the straight-line method. Such amounts for the year ended March 31, 1971, totaled \$577,087 and were computed generally on the basis of the following range of lives:

Buildings and improvements	20 to 30 years
Operating equipment	5 to 10 years
Leasehold improvements	Term of lease

Repairs, maintenance, and renewals were charged to income. Expenditures for improvements have been capitalized. The policy of the Company and subsidiaries is to relieve property accounts and related allowances for properties retired, or otherwise disposed of, at amounts included therein for such properties, and any gain or loss resulting therefrom has been included in the Statement of Consolidated Income.

The Company is amortizing organization expenses and deferred site development costs over a five year period and reorganization expenses over a fifteen-year period, both on a straight-line basis. Such amortization during the year ended March 31, 1971, totaled \$106,419.

#### **NOTE D — INCOME TAXES**

The provision for federal income taxes in prior years was made on the basis of filing separate returns for each subsidiary. It is management's intention to file its federal income tax return for the year ended March 31, 1971, on a consolidated basis.

Deferred income taxes arise from the deferral of initial franchise fee income for accounting purposes until the related retail unit has been opened by the franchisee.

#### **NOTE E — CAPITAL STOCK**

At March 31, 1971, options to acquire 32,220 shares of Common Stock had been granted to officers and employees and 67,780 shares were reserved for future grants. Options granted are exercisable at \$9.38 per share, the market value at the date of grant. On December 26, 1970, 25% of the options became exercisable and another 25% become exercisable annually thereafter. At March 31, 1971, none of the options had been exercised.

#### **NOTE F — COMMITMENTS AND CONTINGENT LIABILITIES**

At March 31, 1971, the Company and subsidiaries were lessees under long-term leases for buildings and equipment expiring through the year 2008. These leases call for minimum annual rental (exclusive of real estate taxes, maintenance, and insurance payments required by some of the leases) of \$3,746,180. The aggregate rental commitment under these leases was \$51,606,908 of which \$3,785,719 represented the approximate aggregate commitment on leases, which at March 31, 1971, covered locations where operations had been suspended. Certain of the leases provide for additional annual rent based on gross sales of the operating hut.

At March 31, 1971, the Company was guarantor of the lease commitments of certain franchisees. The minimum annual and aggregate rentals of such leases were \$571,848 and \$14,500,385 respectively. The Company has also guaranteed certain debt obligations of franchisees and unconsolidated subsidiaries in the approximate amount of \$425,000.

The Company is a party to pending or threatened lawsuits arising from the normal conduct of its business. While it is not possible to forecast the results of these matters, management believes the outcome will not have a material adverse effect on the Company's financial position.

#### **NOTE G — SUBSEQUENT EVENTS**

Included in trade and other receivables at March 31, 1971, was \$350,000 due from Pizza Inn, Inc. Subsequent to year end, this amount increased to \$400,000. Under the terms of the agreement, the Company had been granted a security interest in certain retail operating subsidiaries, 180,000 shares of Pizza Inn, Inc. Common Stock, and an assignment of continuing franchise fees. Effective June 15, 1971, Pizza Inn, Inc. was in default of certain provisions of the loan agreement. On or before June 19, 1971, Pizza Hut, Inc. accepted and assumed ownership and control of the retail operating subsidiaries of Pizza Inn, Inc. pursuant to the terms and provisions of the documents evidencing and securing the above indebtedness and the statutory procedures pertaining thereto. It is the opinion of legal counsel that by reason of the assumption of ownership and control of these corporations the indebtedness has been fully paid.

# ACCOUNTANTS' REPORT

## ERNST & ERNST

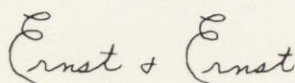

500 FARMERS & BANKERS BUILDING

WICHITA, KANSAS 67202

Stockholders and Board of Directors  
Pizza Hut, Inc.  
Wichita, Kansas

We have examined the consolidated financial statements of Pizza Hut, Inc. and subsidiaries for the year ended March 31, 1971. Our examination was made in accordance with generally accepted auditing standards, and accordingly included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances. We previously made a similar examination of the financial statements for the preceding year.

In our opinion, the accompanying balance sheet and statements of income, stockholders' equity, and changes in financial position present fairly the consolidated financial position of Pizza Hut, Inc. and subsidiaries at March 31, 1971, and the consolidated results of their operations, changes in stockholders' equity, and changes in financial position for the year then ended, in conformity with generally accepted accounting principles applied on a basis consistent with that of the preceding year.

HUT®**

**We serve more pizza  
than anyone else  
in the world!**  **PIZZA  
HUT®**

Reader's Digest. NCAA Basketball. The Today Show. The Merv Griffin Show. The Tonight Show. NCAA Football. This is the IPHFHA National Media Schedule for Pizza Hut in 1971. 17,500,000 copies of the magazine and over 362,000,000 television home impressions! Reader's Digest and all of the television programs were selected with one other primary objective besides their big numbers—their ability to reach Pizza Hut's primary audience.

All the 1971 Pizza Hut advertising materials have been designed to tell the following story:  
**We serve more pizza than anyone else in the world because of quality product, friendly atmosphere, and excellent service.**
